

RESULTS 2019

A summary of ANF's social impact

WATER & SANITATION

Nothing is as immediately essential as water. ANF provides access to safe drinking water and improves the efficiency of water and sanitation services, strengthening communities' capacity to sustainably manage their resources. *Numbers include housing projects

8,996*
people
benefited

872
sanitary
solutions

963
water tap
stands

169
water
filters

12
water
wells

14 water supply systems

3,704 people trained in water, hygiene & sanitation practices

AGRICULTURE

We support smallholder farmers by providing them with access to credit, quality inputs, and technical assistance, while promoting sustainable agroecological practices aimed at achieving food security, reducing vulnerability, and improving incomes.

760
bean farmers
supported with
training and inputs

155
farmers
participated
in high-yield fruit
initiatives

707
farmers trained at
ANF's Agricultural
Training Center

75
beekeepers
supported with
technical assistance
and equipment

110
families benefited
with biodigesters

20
families benefited
with biointensive
gardens

155
coffee and cacao
farmers provided
with inputs and training

EDUCATION

The most promising way out of poverty is through education. We aim to increase school attendance and enhance educational quality by implementing school meal programs, training teachers, building schools, and improving school-level infrastructure.

25,572
students
received
daily
meals

229
schools and
educational
centers

13,096
students
received
school
supplies

8
classrooms
built
benefiting
542 students

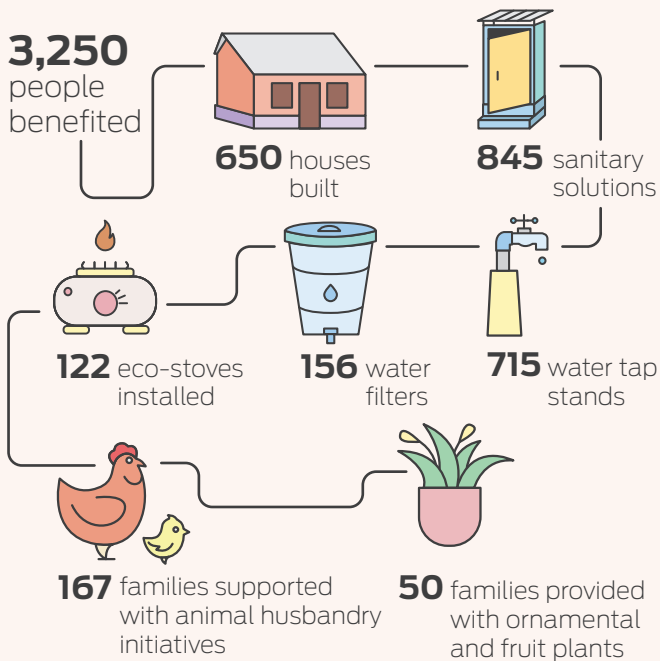

102
people trained
in vocational
occupations

10 teachers trained in Montessori method

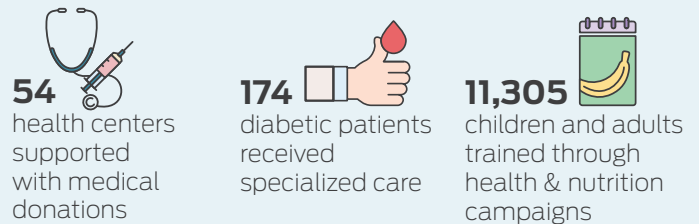

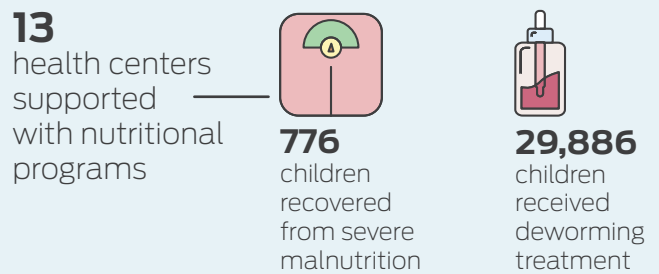

HOUSING

Nearly one million people in Nicaragua lack adequate shelter. In addition to homes, we build community-level infrastructure and provide families what they need to improve their livelihoods.

HEALTH & NUTRITION

Access to quality healthcare is extremely limited in Nicaragua. Through an increased focus on prevention, ANF promotes healthy lifestyles, builds awareness through health education campaigns, and ensures quality nutrition.

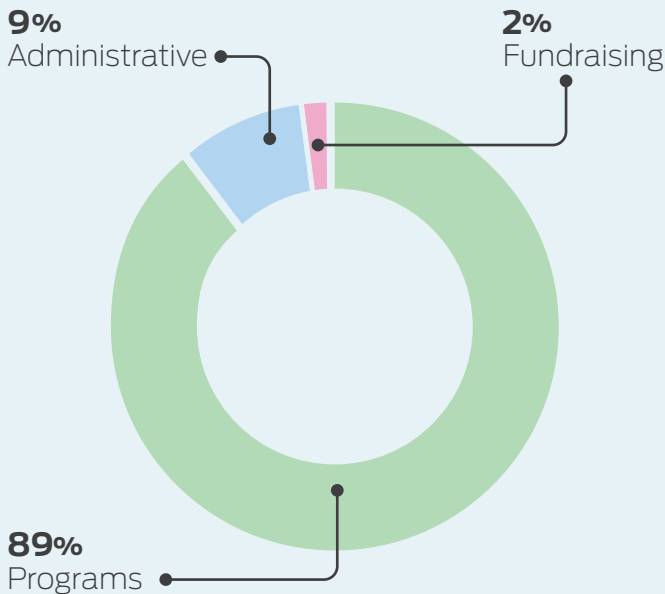

HUMANITARIAN AID

Relief is linked to development. The delivery of food, first aid equipment, and basic goods is prioritized for vulnerable groups such as victims of natural disasters, orphanages, elderly homes, etc.

ANF is a relief and development organization dedicated to alleviating poverty in the lives of the most vulnerable communities across Nicaragua. We take an integrated approach to sustainable development through programs in the areas of education, health, water and sanitation, agriculture, housing, and humanitarian aid. With our local strategic partners, we are able to reach thousands of impoverished families and bring them opportunities that improve their overall quality of life.

EXPENSES BREAKDOWN 2019

- \$11.8 M** Program expenses
 - \$5.9 M Cash allocated to programs
 - \$5.9 M Distribution of in-kind aid
- \$0.3 M** Fundraising expenses
- \$1.2 M** Administrative expenses

- \$13.6 M** Total expenses
